Section 1: What is After-School DMA Parent Default Option and How It Works

In today's digital age, Personal Learning Devices (PLDs) play an important role in supporting students' learning and development. While PLDs provide valuable opportunities for learning, they must be used safely and responsibly. The Device Management Application (DMA) helps support this by guiding appropriate device use and reducing access to inappropriate online content.

The **Default** option is designed to balance educational needs with digital well-being. It provides a structured digital environment that supports learning while encouraging consistent and responsible PLD use.

Under the Default Option, the DMA:

1. Applies school settings during school hours, as defined by the school, to help your child/ward stay focused on learning.
2. Maintains these rules after school hours to promote consistent and responsible PLD use.
3. Implements school-controlled sleep hours to support healthy routines and proper rest.

This guide will introduce the features of the Default Option, to help you understand how it works to create a safe, productive digital environment for your child/ward both in and out of school.

By using this application, you are taking an important step in guiding your child's/ward's digital journey, fostering good habits, and supporting their learning.

	Default Setting
Protects your child/ward from objectionable content	Web content filtering includes, but is not limited to the following categories: • Violent/extremist content • Sexual/pornographic content • Gambling-related content
Reduce distractions from learning through control of applications	Parents/guardians and child/ward will be unable to install additional applications.

Limit screen time	To enforce sleep hours, Single App Mode will be enforced on your child's/ward's PLD from 10.30PM to 6.30AM. The school may subsequently adjust the sleep hours as required, with the end time set no later than 10.30PM and the start time set no earlier than 6.30AM.

Under this option, the school's configured Default Setting will safeguard your child's/ward's PLD during and after school hours through content filtering, restricting installation of applications and limiting screen time.

Section 2: DMA Features

2.1 Web Content Filtering

During school hours and after school hours, your child's/ward's PLD will be protected by **Jamf Safe Internet**. If your child/ward visits a restricted site, the following block screen will appear.

2.2 Application Control

The applications on your child's/ward's PLD will be managed by the school.

If you wish to install additional applications, you will need to change your after-school DMA Parent Option to either Option A or Option B. You can do so by submitting a request to the School DMA Admin.

2.3 Single App Mode

During sleep hours, to enforce sleep hours, Single App Mode will be enforced on your child's/ward's PLD from no later than 10.30pm to no earlier than 6.30am. The default app in this mode is the "Clock" app. While in this mode, the PLD will be forced to stay on the app, and your child/ward cannot switch away from it.

We have come to the end of the Guide. If you have other questions, including changing after-school DMA Parent Options, please contact the respective school's DMA Admin.
