

Moderate Sedation

Course Description:

This course provides learners with the essential skills and knowledge required to ensure safe delivery and monitoring of patients who received moderate sedation. Policies and procedures bounding the practice will also be reinforced. Learners are required to complete pre-course reading and pre-course test online prior to attending the course. Upon completion of pre-course materials, they will undergo a combination of didactics and simulated practice followed by practical assessment.

Learners will be given privileging rights to administer and monitor patients on moderate sedation once they complete the post course quiz, simulated clinical assessment and a clinical practical assessment.

Learning Outcomes:

- List the indications for moderate sedation
- Plan monitoring and nursing care of patients on Moderate Sedation
- Perform accurate sedation assessment and monitoring for patients
- Perform basic airway management for patients with compromised airway protective reflexes during moderate sedation
- Assist in managing patients who developed adverse reactions during moderate sedation
- List the discharge criteria to for patients who underwent moderate sedation
- Discuss the discharge advises to be given to patient who received moderate sedation
