

ECG Essentials

This course aims to equip **Registered Nurses** with the knowledge and skills to interpret cardiac rhythm. Participants will be able to identify normal and abnormal ECG findings, differentiate between different types of arrhythmias, and recognize ECG changes in acute coronary syndromes and manage patients in clinical areas.

Learning Outcomes

Upon completion of this course, the learner will be able to:

1. Discuss the components of ECG waveform
2. Interpret ECG in a systematic way
3. Discuss the initial medical & nursing management of the critical conditions based on ECG rhythms

Course Duration (hours)

12 hours : 4 hours self-directed learning + 8 hours classroom
