

CLINICAL PRECEPTORSHIP COURSE

Provider Activity ID: DCPC01

Overview

This NNA-accredited course aims to empower nurses with the essential knowledge, skills, and attitude for effective clinical supervision for the newly recruited nurses and nursing students from pre-registration or pre-enrolment courses. The course provides an overview of the wide range of roles and responsibilities of the preceptor and serve as a framework to support the efficient, effective integration and enculturation of nurses and students into the team and their respective departments. As an NNA-accredited programme, the course is also open to external participants from all healthcare institutions.
