Continence Management Course

27 - 29 Aug 2026

Lifelong Learning Institute

11 Eunos Rd 8, Singapore 408601

Welcome to Continence management course, 2.5 day program designed to provide healthcare professionals with a comprehensive and practical understanding of bowel and urinary continence. This event covers the anatomy and physiology of micturition, key types and consequences of urinary incontinence, overactive bladder and the management of neurogenic and stress urinary incontinence, as well as bowel related topics covering faecal incontinence and constipation. Emphasis is placed on clinical assessment through structured history taking, physical examination, bladder diaries, and urodynamic evaluation. Interactive workshops will strengthened practical skills in patient assessment, documentation , and diagnostic interpretation, bridging theory with real world clinical practice.
