

Why take Applied Subjects?

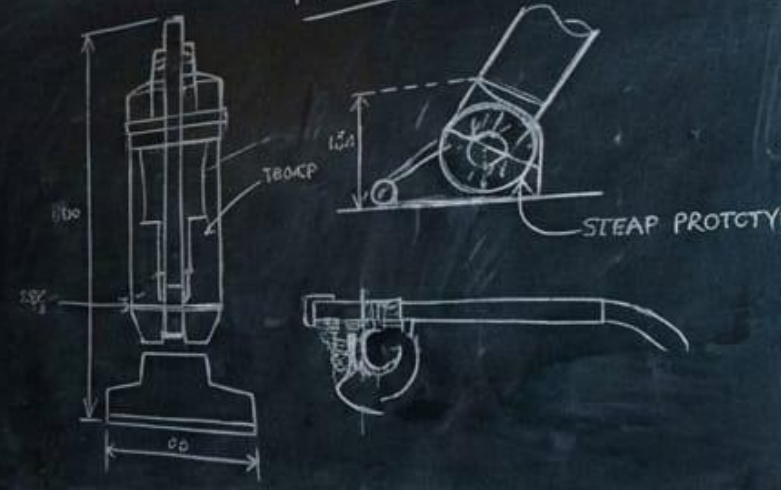

- Develop the mindset and skills to face the world ahead.
- The future needs people who can **THINK, CREATE, ADAPT and IMPROVE.**

Studied Art and Design. Became interested in design Engineering and spoken extensively about the importance of combining knowledge with hands-on problem solving.

FAILURE #5127

Who might enjoy Applied Subjects such as Art, D&T and Nutrition & Food Science?

- You enjoy solving problems — especially problems where there is no single correct answer.
- You like creating and trying out ideas to solve real-life problems.
- You enjoy learning by doing — designing, making, experimenting and improving your work.
- You are curious and willing to learn new skills and use what you learn in different situations.

About C&T Subjects

- The only subjects where question papers are given at the start of the examination year to work on.
