

EXPERIENCING WGPS

LEARNING FESTIVAL

The Primary 5 Woodgrovians started their Term 3 with the 3-day Learning Festival, which was filled with exciting activities. These include designing SOAR plane, which we hope the Woodgrovians will have the Courage to Soar. They went to Kampung Kampus to learn about Singapore's first nature-led, experiential learning campus and learnt how a strong community spirit could overcome challenges to provide a space where people can interact, bond and build character while embracing a sustainable lifestyle. Through the Virtual Learning Journey to China, our Woodgrovians also learnt about the culture of China, including popiah-making. Basic coding skills were taught in the Hour of Code. During the PE Challenge, they competed with other classes where they honed their skills and understood the importance of teamwork.
