

What are our student leaders saying?

## NAYLA ARIANNA BINTE MOHAMAD YASIN

Head Prefect 2024/2025

One area that I have done well in is leading the Prefects. I think I did well in serving them. I led many projects such as the Student Agency Project, the Water Balloon Challenge during one of the Prefect meetings with the help of some P6 Prefects and the Vice-Head Prefects, Teachers' Day celebrations and more. During all of these projects, I learnt that you have to lead from behind for a better outcome. If I lead from the front, some may think that I am bossing them around and their thoughts would not be heard. So, to lead from behind, everyone's thoughts will be included. I also ensured that Vice-Heads stay united and checked up on them to see if the Prefects are doing well as they are the ones working closely with them.

One area that I felt that I have grown a lot in is my bond with the Prefects. When I first became a Head Prefect, I did not manage to bond with the Prefects but after one year, I have grown much closer to the Prefects through various projects. I think that I have also grown in knowing how to engage in discussions if things are due soon. I also learnt to be more firm in certain situations, to appropriately use the a spectrum of approaches for different situations.

One area that I could have done better is to keep track of certain deadlines. Based on past experiences, the Vice-Heads and I have missed a few deadlines so I would like to improve by paying closer attention to the date and ensuring that whatever that needs to be done is completed.
